

GENESIScoin

PROOF BEFORE PROMISE

A fully automated token ecosystem — every bonus, payout, and release is executed by code, not people. No admin override. No manual intervention. The blockchain is the only authority.

01 — TOKEN

The Asset

100B TOTAL SUPPLY GENC	ZERO MINT FUNCTION	BNB CHAIN	25% MAX TAX — HARDCODED CAP
----------------------------------	------------------------------	---------------------	--

Supply was minted once at deployment and cannot be increased. Ever. The contract has no `_mint()` function. → [BscScan](#)

TAX STRUCTURE

BUY 7% 1% Auto-Burn · 1% Liquidity 1% Dev · 1% Marketing 1% Team · 2% BNB Dividends	SELL 10% 1% Auto-Burn · 4% Liquidity 2% Dev · 0.5% Marketing 0.5% Team · 2% BNB Dividends	TRANSFER 2% 1% Auto-Burn 1% BNB Dividends
---	---	--

Tax parameters are **locked for the first 200 days** of Public Sale. Changes after that require community vote.

02 — PRE-SALE

5 Stages. Increasing Price.

Each stage sells out or times out before the next opens. Oracle closes stages on-chain — no manual switching.

Stage 1	Stage 2	Stage 3	Stage 4	Stage 5
\$0.0001	\$0.0002	\$0.0003	\$0.0004	\$0.0005
per GENc	per GENc	per GENc	per GENc	per GENc
+4% bonus	+8% bonus	+9% bonus	+10% bonus	+15% bonus

B100D — 100-Day Loyalty Program

Launches after Pre-Sale ends. Hold $\geq 15,000,000$ GENc to register.

15,000 GENc paid every day for 100 days to every active participant.

Drop below threshold → automatic ejection by bot.

Day 100 → Final Bonus distributed proportionally to initial holding.

03 — PUBLIC SALE

Daily Bonuses. Automatic.

Public Sale runs in phases. Each phase has a buy threshold to qualify for the daily bonus. Bot monitors LP buys and grants rewards automatically.

Days 1–100	Days 101–200	Days 201–300	Day 301+
PHASE 1 · 100K	PHASE 2 · 130K	PHASE 3 · 200K	PHASE 4 · 300K
GENC/DAY	GENC/DAY	GENC/DAY	GENC/DAY

Unused daily bonus tokens roll over to the next day. Dividend pool distributes BNB to holders automatically every 21–28 days.

04 — ASSETMANAGER V2

No One Can Move Funds Alone.

All allocation pools are locked in a multisig-controlled contract. Owner proposes, 2-of-4 committee approves, anyone executes. Time-locks enforce waiting periods.

Airdrop Stages	Airdrop Milestones
----------------	--------------------

Cap: 1,500,000,000 GENc Executor: Automated bot 5 releases · 100M → 500M GENc each	Cap: 1,000,000,000 GENc Executor: 2-of-4 Multisig Triggered by holder count: 100 / 250 / 500 / 1k / 1.5k
Partners Time-locked release Executor: 2-of-4 Multisig Mandatory 240-hour cliff after arming	Contest Rewards Time-locked release Executor: 2-of-4 Multisig Mandatory 72-hour cliff after arming

All destination wallets are hardcoded constants. Cannot be changed after deployment.

05 — CAMPAIGN CORE MESSAGES

What to Communicate

 Supply can't inflate No mint function exists in the contract. 100 billion GENc — fixed forever. Verifiable on BscScan in 30 seconds.	 No human controls payouts Every bonus, dividend, and airdrop is executed by bots responding to on-chain events. Code runs the system, not admins.
 Funds need 2-of-4 signatures No single person can move allocation pools. Multisig + time-locks on every major release. Cliff periods are enforced by contract.	 Buy early = better price Stage 1: \$0.0001 · Stage 5: \$0.0005 . Price increases with each stage. Early buyers also get the highest bonus %.
 Hold = get paid in BNB 2% of every buy, sell, and 1% of transfers goes to the dividend pool. BNB distributed automatically every 21–28 days to holders.	 Everything is on-chain Every event — WhitelistClosed, B100DDayCompleted, StageReleased — is permanently recorded. BscScan is the proof. No promises needed.

The Chain Writes the History

WhitelistOpened / Closed	B100D participation windows — committed on-chain
B100DDayCompleted	Each of 100 payout days confirmed separately
FinalBonusBatchProcessed	Final distribution — every batch has its own tx hash
StageReleased / MilestoneReleased	Every airdrop release recorded with exact amount
DividendPaid	Per-recipient BNB payout records
Armed / Executed / Cancelled	Full multisig audit trail for all allocation releases

Verify Everything
